

COMPLETE WOMEN'S CARE

A Division of Mid-Atlantic Women's Care, P.L.C.

At Complete Women's Care (CWC), we believe in equality for all. We strive to maintain a welcoming and supportive environment that provides equal opportunity for our providers and our staff, and the best possible medical care for all of our patients. We mourn the recent deaths of George Floyd, Breonna Taylor, Ahmaud Arbery, and the countless others who have been killed and victimized by systemic racial injustice. We condemn all forms of racism and police brutality. We believe that racism and discrimination in any setting, including health care and law enforcement, are unacceptable. We also recognize how our current pandemic again shines a light on the disproportionate numbers of patients in our Black and Brown communities that are adversely affected by health disparities.

Black Lives Matter, and our CWC family stands in solidarity with our providers, staff, patients, and our community impacted by systemic racism, social injustice, and health disparities. We support equitable treatment of all and are committed to the necessary self-reflection, conversations, and actions to bring about change in our local community and our society at large.
